## (54) CODE DIVISION MULTIPLE ACCESS COMMUNICATION SYSTEM AND SENDING POWER CONTROL METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To control the incoming sending power when the one-way communication is carried out in a CDMA(code division multiple access) system mobile communication system.

SOLUTION: The receiving level is decided for the signal that is sent from every mobile terminal, and a transmission channel sending power control signal production part 46 produces a sending power control signal for every channel. These control signals are multiplexed and transmitted to the mobile terminals via a transmission channel sending power control signal insertion part 41 that is prepared on a channel used in common to the mobile terminals.

## LEGAL STATUS

[Date of request for examination] 20.08.1999

[Date of sending the examiner's decision of rejection] 25.12.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]	2002-001055
